

Each of the eleven numbers is a nominal plus a factory tolerance

The designer picks the nominal. The factory adds scatter within the tolerance. Tolerances from Huawei.

PARAMETER	NOMINAL	REAL TOLERANCE
material constant	3.91	2%
board thickness	as drawn	10%
copper thickness	1.87	1%
copper widths A1 to A9	not supplied	5%
resistors 1, 2 and load	1100, 342, 50 ohm	5%

Shaded rows hold the parameters that drive most of the variation.
